

Experience, Innovation and Dedication

Injection Molding

Almega Plastics began production in July of 2003. Our Ownership has in excess of a combined 100 years experience in the molding business. We are also fortunate to have assembled a highly qualified and dedicated staff of technicians which allows us to operate our facility 24/7.

We offer a unique blend of expertise in all areas of molding, tooling, lining, and quality assurance with the end result being the ability to bring our

customers quality products at a very competitive price.

At Almega, we mold a wide array of products from health and beauty, to Food and Beverage, (Bottles and Closures), and the medical field (Dosage cups, etc.....)

We have the experience in building and running single unit to high cavitation stack and unscrewing molds. These capabilities will continue to keep Almega Plastics at the forefront of the injection molding industry.

There are many good molders. What sets Almega Plastics apart is our commitment to go "the extra mile" for our customers, and to do whatever it takes to get the job done right.

A modern 54,000^{sf}, Climate Controlled Facility with ample room for expansion.

Current State-of-the-Art Injection molding presses from 185T - 500T.

Injection Molding Machinery:

- 2 500 T
- 1 350 T
- 3 300 T
- 2 200 T
- 1 185 T

Lining Equipment:

- 2 MMC#4 Lining Machines
- 2 Nestech Lining and Assembly Machines
